WHY CHOOSE EMRACK?

AUSTRALIA WIDE SERVICE

WE PROVIDE INDUSTRY-SPECIFIC STORAGE SOLUTIONS ACROSS AUSTRALIA, CUSTOM-DESIGNED TO MAXIMISE SPACE, IMPROVE EFFICIENCY AND SUPPORT BUSINESSES OF ALL SIZES & SECTORS!

Businesses often have the opportunity to save significant amounts on overall capital costs, and increase workplace productivity - simply by utilising available space in the most effective manner.

Our dedicated team of industrial sales executives, engineering and project delivery specialists have a deep understanding of how businesses can most efficiently work within their premises.

RACKING PROJECT EXPERTS

DISCOVER OUR DIVERSE PRODUCT RANGE – CUSTOMISABLE, DURABLE STORAGE SOLUTIONS DESIGNED TO OPTIMISE SPACE & BOOST EFFICIENCY ACROSS MANY INDUSTRIES.

We provide full floor plan support, detailed planning and consultation with all projects fully 3D modelled, mapped & drafted – ensuring flexible, logical solutions for every project.

We service industry and project based needs which are subject to minimum order quantities, generally not suitable for direct to public sale.

HIGHEST GLOBAL STANDARDS

AT EMRACK, WE DESIGN AND DELIVER STORAGE SYSTEMS THAT MEET THE HIGHEST GLOBAL SAFETY & QUALITY STANDARDS, ENSURING RELIABILITY AND PEACE OF MIND.

To uphold the highest standard of safety and compliance, we work closely with independent engineering consulting firms alongside our in-house engineering and drafting teams to ensure all products and projects are delivered to the relevant Australian standards and International Compliance and Environmental guidelines.

OUR SERVICES

WE OFFER A COMPREHENSIVE RANGE OF SERVICES TO KEEP YOUR STORAGE SOLUTIONS SAFE & EFFICIENT – WHETHER YOU'RE SETTING UP A NEW WAREHOUSE OR UPGRADING AN EXISTING ONE, OUR TEAM IS HERE TO HELP EVERY STEP OF THE WAY.

CONSULTATION & EXPERT ADVICE

Ensure your warehouse storage system is efficient, safe, and optimised with our expert consultation. We assess your space, stock flow and operational needs to design racking solutions that improve productivity.

PROFESSIONAL RACKING INSTALLATION

Proper installation is key to safe and efficient storage. Our experienced team ensures your racking system is securely installed, compliant with Australian standards, and built for long-term durability.

PROJECT MANAGEMENT

From planning to installation, we can handle every aspect of your storage project. Our project team ensures your racking system is delivered on time, within budget and meets all your requirements.

WAREHOUSE RELOCATIONS & RACKING MOVES

Minimise downtime with our warehouse relocation services. We dismantle, transport, and reinstall your racking system safely and efficiently, ensuring a smooth transition with minimal business disruption.

SAFETY AUDITS & COMPLIANCE INSPECTIONS

Keep your warehouse safe and compliant with regular racking inspections. Our audits identify potential risks, verify load capacities and ensure your storage system meets Australian safety standards.

REPAIRS & MAINTENANCE

Prevent damage and extend the life of your racking with our maintenance and repair services. We provide routine checks, structural repairs, and emergency fixes to keep your storage system in top condition.

THE INDUSTRIES WE SERVICE

RETAIL MERCHANDISING

Emrack provides Big Box, Gondola, A-Frame & Long Span Shelving to maximise display efficiency and improve retail stock organisation.

MINING & HEAVY INDUSTRY

Emrack's heavy-duty racking systems provide high-capacity storage for mining equipment, spare parts, and tools in demanding environments.

TYRE & AUTOMOTIVE SPARE PARTS

From spare parts to tyres, Emrack's pallet racking, long-span shelving, and tyre storage systems keep automotive stock organised and easy to access.

TRADE & BUILDING MATERIALS

Emrack's racking solutions for timber, pipes, and plasterboard ensure secure storage, easy handling, and efficient space utilisation in trade warehouses.

CHEMICAL & HAZARDOUS MATERIALS

Our racking & shelving provides secure, compliant storage for both hazardous & non-hazardous chemicals, ensuring workplace safety.

ALUMINIUM & STEEL

Our Cantilever, A-Frame & Pallet Racking can safely store aluminum sheets, steel beams and metal profiles while maximising space & accessibility.

TIMBER FRAME & TRUSS

We have a number of purpose fit racking solutions that ensure safe & efficient storage of oversized timber lengths, frames or trusses.

PIPE & TUBING

Our Cantilever & A-Frame racking offers secure storage for long and heavy pipes, reducing handling risks and improving warehouse efficiency.

PLASTERBOARD & SHEET MFG

Our Spreader Cantilever System, is purpose designed to protect delicate plasterboard sheets from warping and breakage, ensuring safe storage.

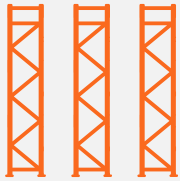

PLASTICS & PLUMBING

Our racking solutions keep pipes, fittings & plastic components organised, secure and easily accessible for efficient inventory management.

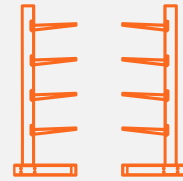

OUR PRODUCT RANGE

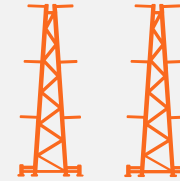

PALLET RACKING

Maximise your warehouse space with Emrack's Pallet Racking systems with selective, drive-in, and double deep racking options for your storage needs.

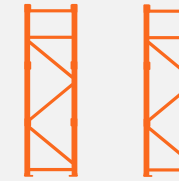

CANTILEVER RACKING

Our durable Cantilever Racking solutions are perfect for storing long, bulky items like timber and pipes — with custom solutions for any industrial spaces.

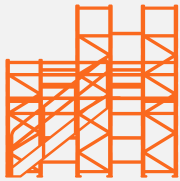

A-FRAME RACKING

Efficiently store long & narrow items with our A-Frame Racking. Ideal for retail and industrial environments with customisable heavy-duty designs.

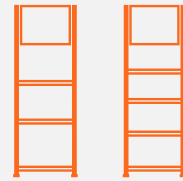

LONG SPAN SHELVING

Our Long Span Shelving is a versatile storage solution — perfect for warehouses, workshops & retail spaces with customisable options.

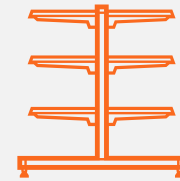

PIGEON HOLE & MEZZANINE

Expand your storage space with Pigeon Hole & Mezzanine systems — custom-built, durable, and safe solutions for warehouses & industrial facilities.

BIG BOX RACKING

Store high density boxed stock with our Big Box Racking. High visibility and heavy-duty racking systems, perfect for Industrial & Retail environments.

GONDOLA SHELVING

Flexible & sturdy Gondola Shelving for any retail store, with highly customisable solutions for improved product visibility and space efficiency.

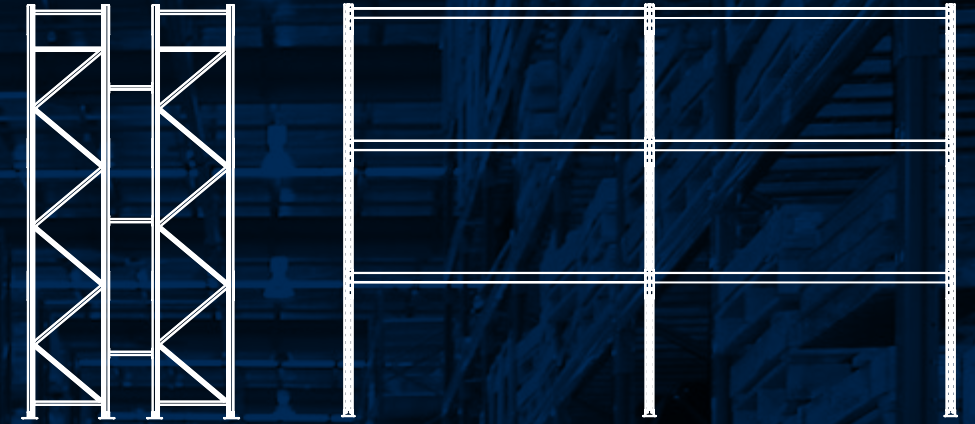

STEEL & OEM SYSTEMS

Secure and efficient storage for heavy-duty applications with Emrack's steel stillage & custom OEM racking systems.

INDUSTRIAL STORAGE

PALLET RACKING

EMRACK PALLET RACKING SYSTEM

MAXIMISE YOUR WAREHOUSE SPACE WITH EMRACK'S HIGH-QUALITY PALLET RACKING SYSTEMS. WE OFFER SELECTIVE, DRIVE-IN, AND DOUBLE DEEP RACKING OPTIONS FOR YOUR STORAGE NEEDS.

Pallet racking systems are essential for efficient storage and organisation in warehouses, distribution centres, and industrial facilities.

Designed to hold palletised goods, these systems optimise vertical space while ensuring easy access to inventory. With their modular and durable design, pallet racking systems are customisable to meet various storage requirements, from high-density solutions to selective access.

At Emrack, we provide a wide range of pallet racking solutions, including selective racking, double-deep racking, and drive-in systems.

Constructed from high-quality steel, our racks offer exceptional load-bearing capacity, ensuring safety and durability in demanding environments.

CUSTOMISABLE SOLUTIONS

Choose from various racking types, including selective, double-deep, and drive-in systems, tailored to your storage needs.

MAXIMUM PRODUCTIVITY

Vertical storage maximises floor space, allowing you to store more inventory without expanding your facility.

BUILT FOR LONGEVITY

Made from high-quality steel with durable finishes, our pallet racking systems are built to withstand heavy loads and frequent use.

INVENTORY MANAGEMENT

Easy access to pallets ensures faster picking and replenishment, improving workflow and reducing downtime.

**WHY CHOOSE
EMRACK
PALLET
RACKING
SYSTEM
?**

PALLET RACKING CONFIGURATIONS

SINGLE SELECTIVE

The most common type of pallet racking, selective racking provides direct access to every pallet. It's versatile, cost-effective, and ideal for warehouses with a wide variety of SKUs. Adjustable beam heights allow for easy customisation to accommodate different pallet sizes.

BACK TO BACK

The ability to stack two pallets deep with access most commonly provided from entry face only. Storage density increased as rack ratio changes from Selective Racking. Most common in large-format DC environments requiring multiple lanes.

DOUBLE DEEP

Double-deep racking stores pallets two-deep, doubling storage capacity compared to selective racking. While it reduces direct access to some pallets, it's an excellent option for warehouses that prioritise high-density storage.

NARROW ISLE & HIGH BAY

Makes optimum use of floor area and roof height, providing high density storage with 100% accessibility and good stock rotation. Commonly used with 'man-up' equipment and floor-guides for ease of use.

DRIVE-IN RACKING

Drive-in racking allows forklifts to drive directly into the racking system to load and retrieve pallets. Perfect for high-density storage of similar items and is designed for Last-In, First-Out (LIFO) operations.

PUSH BACK & PALLET FLOW

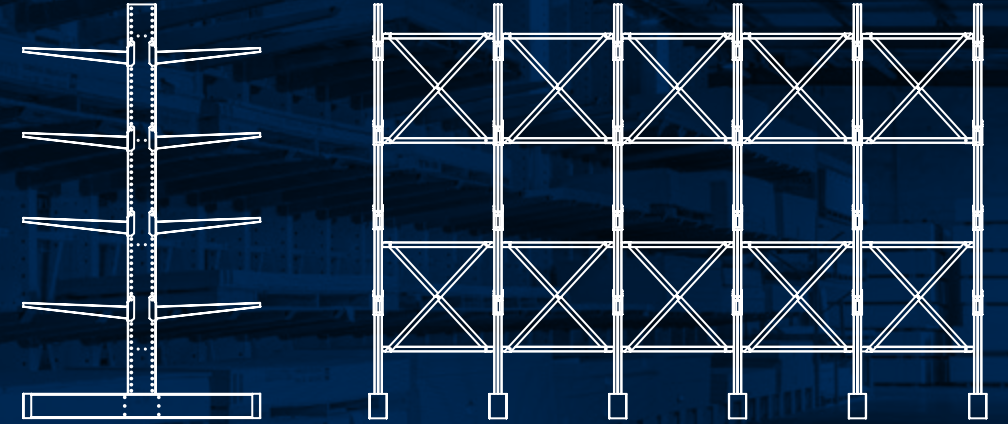

Push-back racking allows pallets to be loaded onto a series of nested carts that move along inclined rails. This high-density storage system provides Last-In, First-Out (LIFO) access while minimising aisle space.

INDUSTRIAL STORAGE

CANTILEVER RACKING

EMRACK CANTILEVER RACKING SYSTEM

WHEN YOU NEED SAFE & EFFICIENT STORAGE SOLUTIONS FOR YOUR LONG OR BULKY MATERIALS LOOK NO FURTHER THAN THE EMRACK CANTILEVER RACKING SYSTEM

Emrack Cantilever Racking is a system that is recognised as the most efficient warehouse solution for the storage or distribution of your long-length, bulky building materials.

Our Cantilever racking ensures zero space wastage & maximum operational efficiency. In high volume or multi-product/SKU environments, Cantilever Racking provides unbeatable space-saving and operational efficiencies.

By providing un-hindered access to every product slot, Cantilever Racking delivers selectivity and line-of-sight to even the bulkiest of product.

Articulated arms prevent against structural or product damage. Emrack Cantilever Racking System Arms move up and down freely to protect both the rack and product from forklifts.

MODULAR & DURABLE DESIGN

Expand or modify the system as your business grows. Emrack Cantilever is made from high-grade steel to ensure longevity & safety.

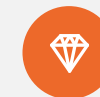

MAXIMUM PRODUCTIVITY

Our open-front design enables quick and safe loading, while the adjustable arms allow you to customise the height & position to fit your exact storage needs.

HEAVY LOAD CAPACITY

Perfect for storing heavy loads, with options for both light & heavy-duty requirements. Independently Certified & Engineered to meet all requirements

HARDY TRADE TOUGH FINISH

Available in powder coated or hardy Hot-Dip Galvanized finish options with customisable colour schemes to match your company branding.

WHY CHOOSE EMRACK CANTILEVER RACKING SYSTEM?

CANTILEVER RACKING
EMRACK.COM.AU

CANTILEVER RACKING CONFIGURATIONS

STANDARD CANTILEVER

Our standard Cantilever Racking is the most efficient solution for storage of your long-length, bulky building materials, featuring articulated arms prevent against structural or product damage.

SPREADER CANTILEVER

Spreader Cantilever System has the added versatility of adjustable spreader support bars, specially designed to store flexible plasterboard & sheet products perfectly level with no sag between arms.

TRUSS CANTILEVER

Truss Cantilever system is designed for the storage or distribution of your long-length, bulky building materials such as completed Frames and Trusses, or packs of timber stock.

LIGHT-DUTY CANTILEVER

Light Duty Cantilever Racking is a smaller form factor development of our industry proven Cantilever System, designed for long materials with lighter weight requirements.

CANTILEVER ROOF SYSTEM

A Cantilever System with an integrated roof, designed for outdoor racking exposed to the elements. Featuring a large roof arm overhanging the footprint of the rack, protecting products from weather.

CANTI-CLAD SYSTEM

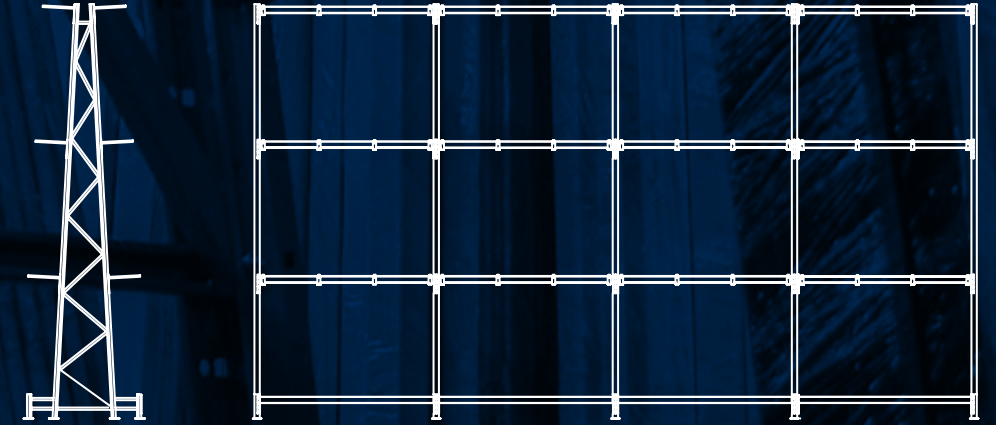

Our Canti-Clad System is the ultimate outdoor storage solution for long-length or bulk product. The specialised cladding and roofing system offers complete protection from the elements.

INDUSTRIAL STORAGE

A-FRAME RACKING

EMRACK A-FRAME RACKING SYSTEM

OUR A-FRAME RACKING SYSTEM IS PERFECT FOR STORING & DISPLAYING LONG LENGTHS OF STEEL, ALUMINIUM, PLASTIC AND TIMBER – AVAILABLE IN A VAST RANGE OF SIZES & CONFIGURATIONS

The Emrack A-Frame racking system allows for easy picking and identification of long length slender products, in a vertical or 'stand-up' configuration. The slimline, adjustable divider arms allow for maximum use of available space while still storing multiple length products easily and safely.

With a wide range of applications, sizes and configurations, Emrack A-Frame racks are available in single or double sided, with custom solutions available to suit every requirement.

EFFICIENT DESIGN

The angled design lets you store long, narrow items vertically, maximising floor space and improving organisation.

MAXIMUM PRODUCTIVITY

The open-front design allows for quick and hassle-free retrieval of items, speeding up workflow and reducing handling time.

PRODUCT VISIBILITY

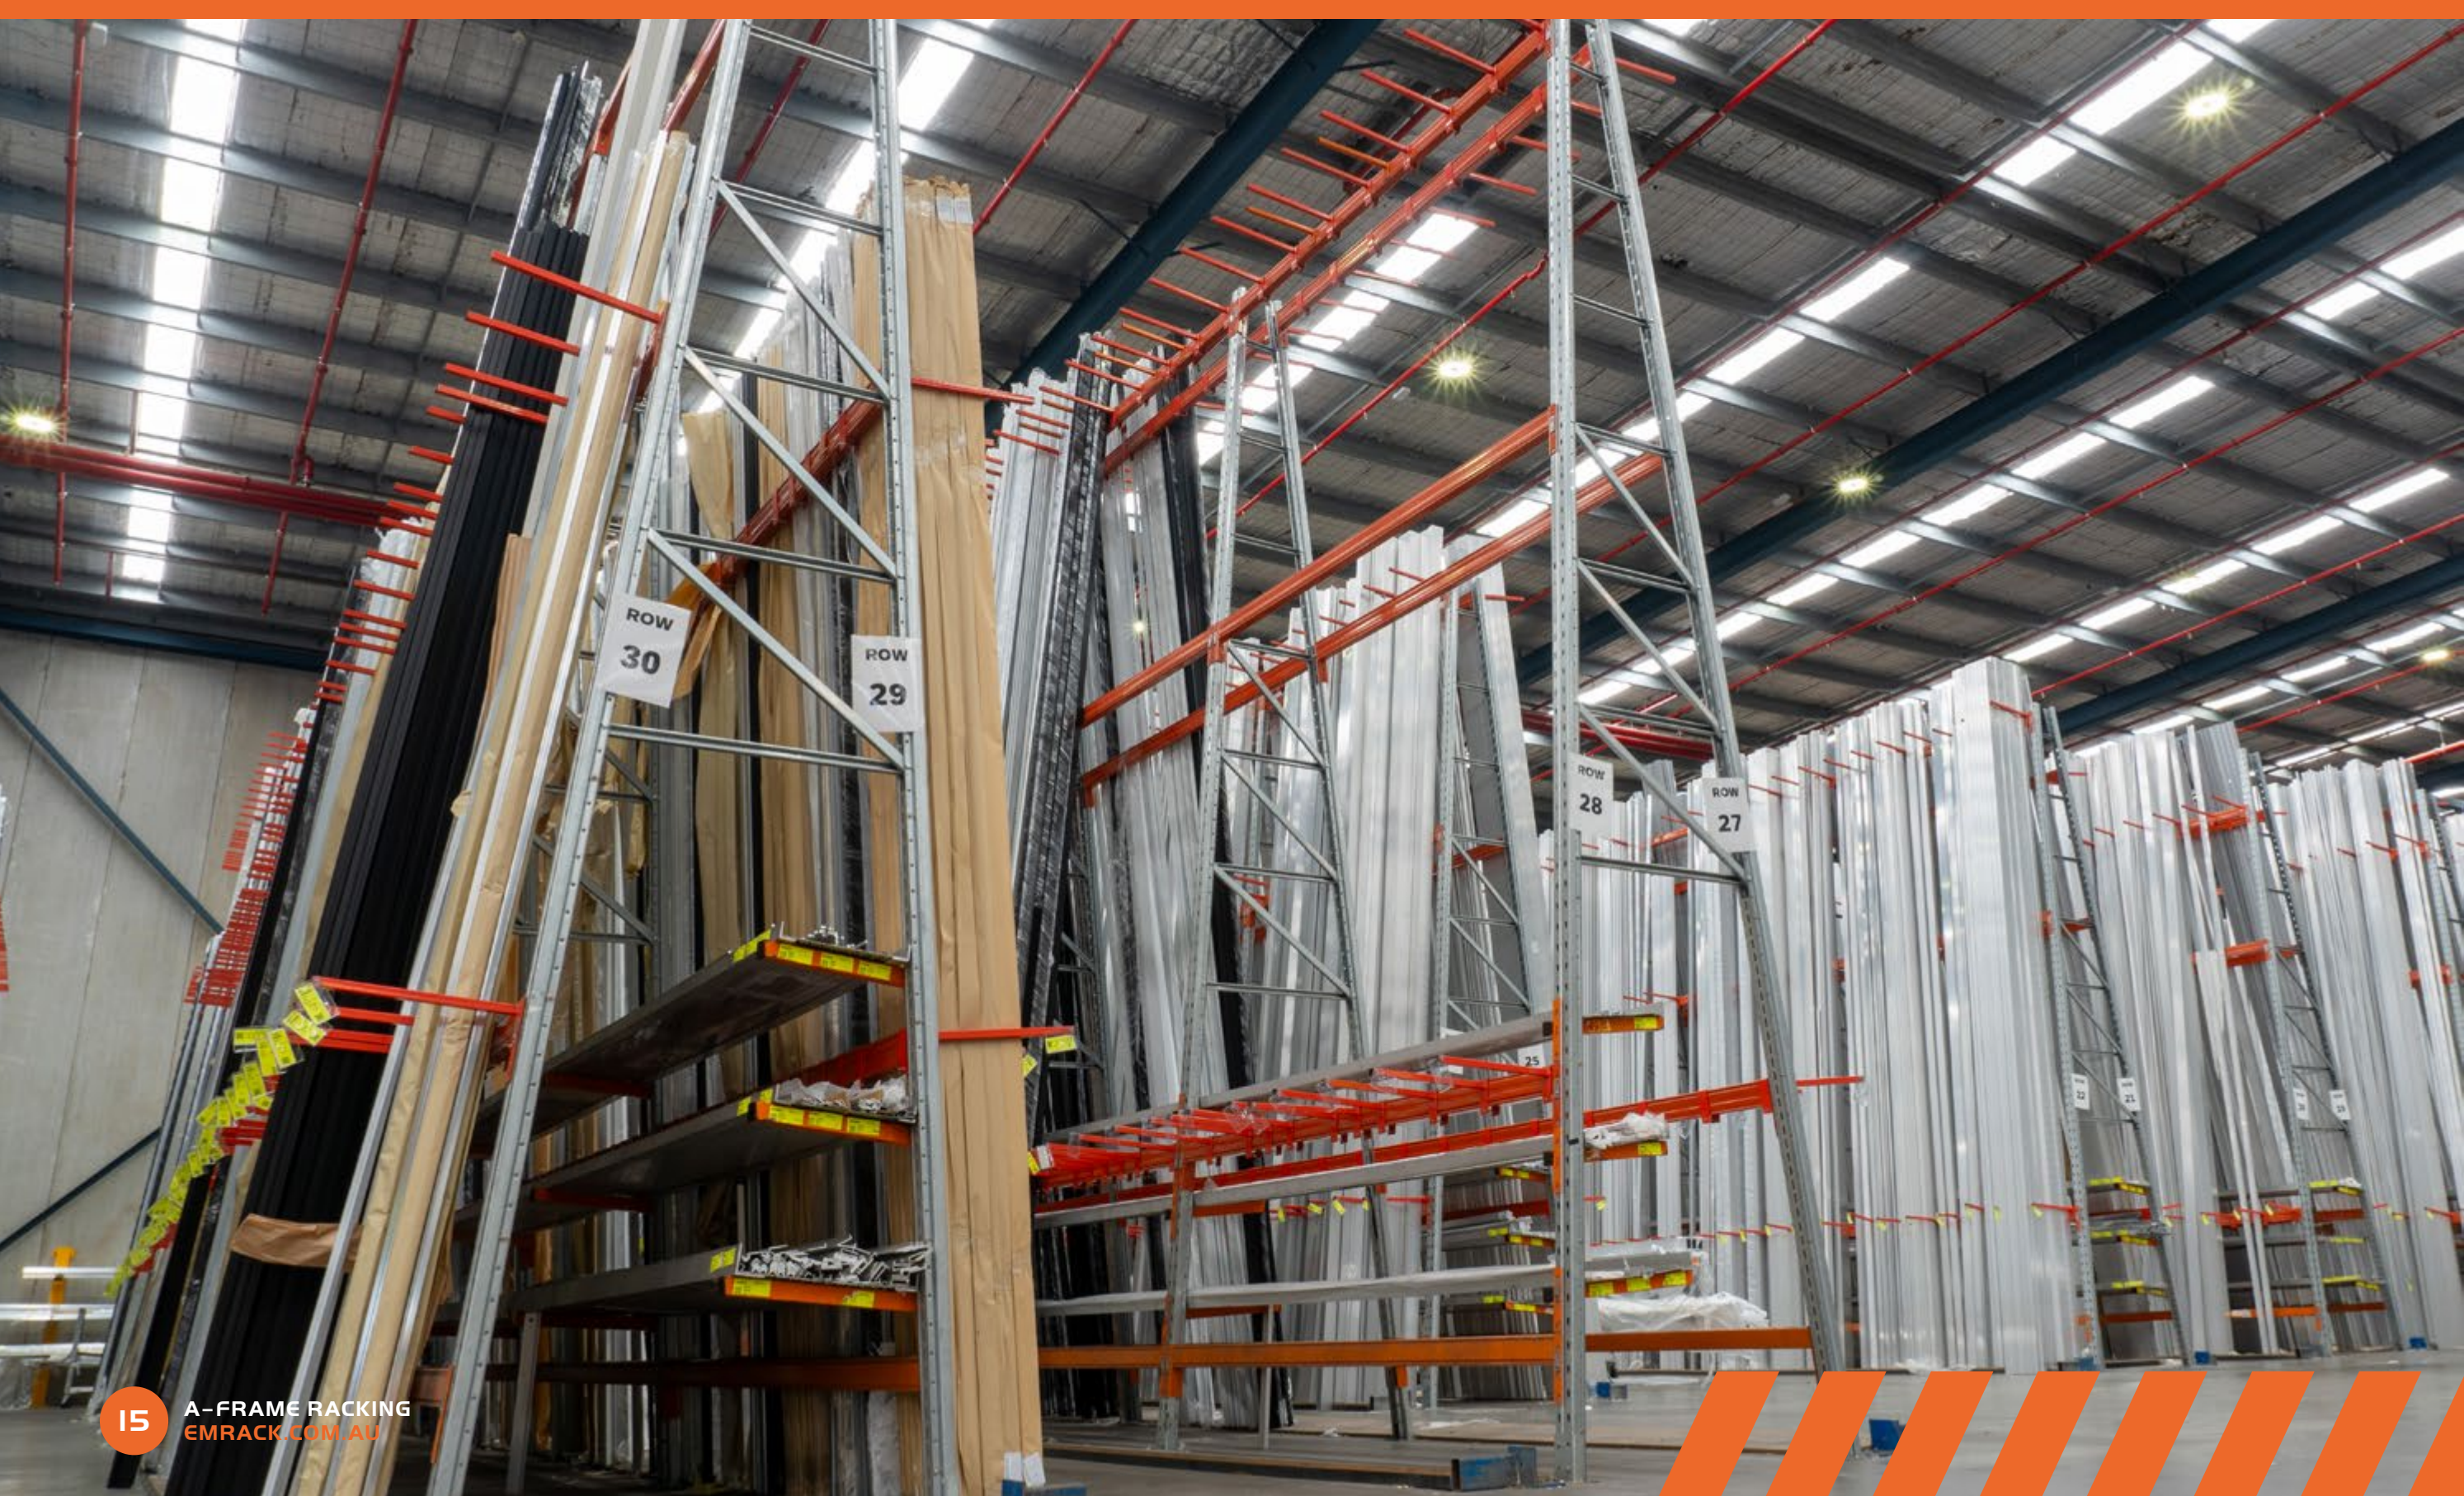

Items are well-organised and clearly visible, making it easier to manage inventory and locate products efficiently.

BUILT TRADE TOUGH

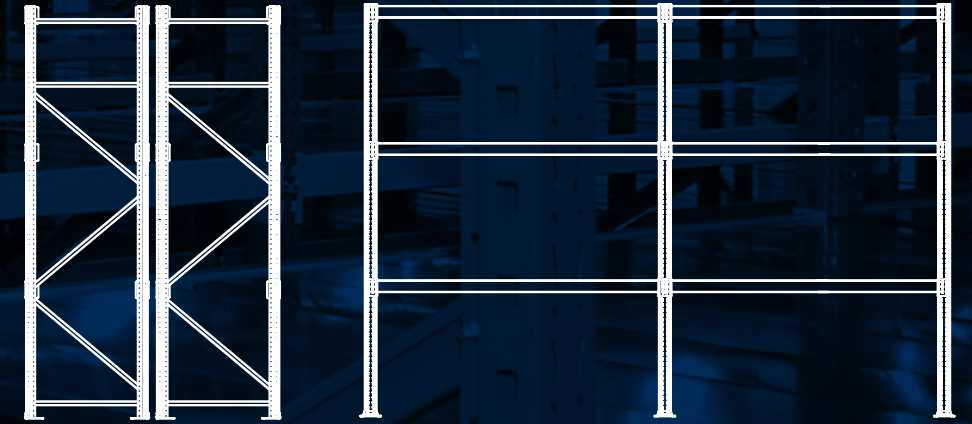

Built for industrial use, A-Frame racks are made from durable materials to support heavy loads and withstand tough environments.

WHY CHOOSE EMRACK A-FRAME RACKING SYSTEM?

INDUSTRIAL STORAGE

LONG SPAN SHELVING

EMRACK LONG SPAN SHELVING SYSTEM

MAXIMISE STORAGE EFFICIENCY WITH EMRACK'S VERSATILE AND DURABLE LONG SPAN SHELVING SYSTEM – PERFECT FOR WAREHOUSES, WORKSHOPS & RETAIL SPACES!

Long span shelving is the ultimate storage solution for medium to heavy-duty loads, offering unmatched versatility, strength and convenience.

Designed with durability and adaptability in mind, it's perfect for organising items of varying sizes in warehouses, workshops and retail spaces.

Our long span shelving systems are constructed using premium steel frames and beams, ensuring a stable and reliable structure. The system's adjustable shelves allow for easy reconfiguration, making it adaptable to changing storage needs.

Whether you're storing small parts, heavy tools, or bulky inventory, long span shelving ensures optimal use of space while keeping everything accessible and organised.

MODULAR DESIGN

Adjustable beams and shelves let you adapt shelving to fit various item sizes. Add bays as needed for expanding storage requirements.

SPACE EFFICIENCY

Maximise vertical and horizontal space while keeping items organised, reducing clutter and boosting productivity.

MULTI-INDUSTRY VERSATILITY

Ideal for retail, warehousing, and manufacturing, offering versatile storage for a wide range of applications.

HARDY BUILD QUALITY

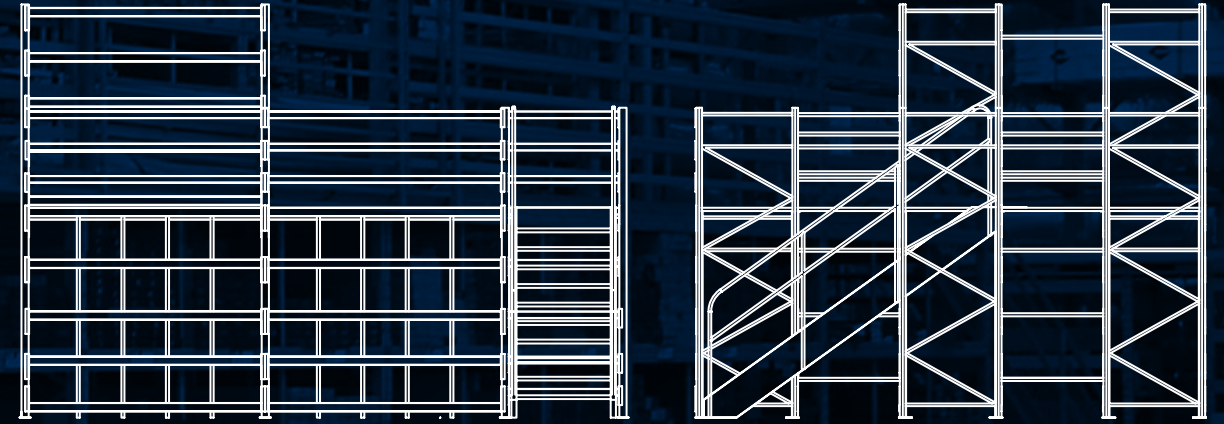

Made from powder-coated steel, it's built to withstand daily wear, ensuring long-lasting performance in demanding industrial settings.

WHY CHOOSE EMRACK LONG SPAN SHELVING SYSTEM?

INDUSTRIAL STORAGE

PIGEON HOLE & MEZZANINE

EMRACK PIGEON HOLE & MEZZANINE SYSTEMS

STORE LONG & HEAVY ITEMS LIKE TIMBER WITH EASE USING EMRACK'S PIGEON HOLE & MEZZANINE SYSTEMS – PERFECT FOR THE HARDWARE AND TRADE RETAIL ENVIRONMENT!

Pigeon hole storage and mezzanine systems are specialised heavy-duty storage solutions designed for holding long-length items such as timber, pipes, or beams.

Pigeon hole racks offer horizontal compartments to keep materials organised and accessible, making stock picking fast and efficient.

These systems are widely used in hardware stores, trade retail environments, and industrial facilities where quick access to large, heavy materials is essential.

A mezzanine system complements pigeon hole storage by adding an extra level of usable space. Mezzanines are ideal for storing additional inventory, creating workspaces, or separating stock zones.

HARDY BUILD QUALITY

Designed to hold long and heavy items like timber, beams, or pipes, these systems provide exceptional durability and support.

SPACE OPTIMISATION

Horizontal pigeon holes keep long materials neatly organised, while mezzanines maximise vertical space, creating room for additional inventory or workspace.

EFFICIENT STOCK PICKING

The pigeon hole compartments ensure materials are stored horizontally for easy retrieval, streamlining operations.

CUSTOMISABLE DESIGN

Pigeon holes and mezzanines can be configured to suit your stock sizes, facility layout, and load capacity requirements.

WHY CHOOSE EMRACK PIGEON HOLE AND MEZZANINE SYSTEM?

RETAIL DISPLAY

BIG BOX RACKING

EMRACK BIG BOX RACKING SYSTEM

STORE HIGH VOLUME BOX STOCK EFFICIENTLY WITH EXCELLENT PRODUCT VIABILITY USING EMRACK'S BIG BOX RACKING – PERFECT FOR TRADE RETAIL, HARDWARE AND HOMEWARES STORES!

Big Box Racking is a large-format shelving system designed to handle bulky, oversized items commonly found in trade retail, hardware stores and department stores.

Built for durability and easy access, it combines strength with versatility, making it ideal for high-traffic retail environments.

With wide bays, high load capacities, and adjustable shelving levels, Big Box Racking can store a variety of products, from building materials and tools to furniture & homeware displays.

The modular design ensures Big Box can be customised to fit the unique layout and inventory needs of any store, optimising space while improving stock visibility and accessibility.

EFFICIENT DESIGN

Modular and adjustable shelving configurations allow you to adapt the racking to fit your store's layout and product mix.

OPTIMISED SPACE USAGE

Big Box Racking helps you maximise floor and vertical space, making it ideal for both sales floors and stockrooms.

PRODUCT VISIBILITY

Wide bays and open shelving ensure that products are easy to see, access and manage – enhancing the shopping experience.

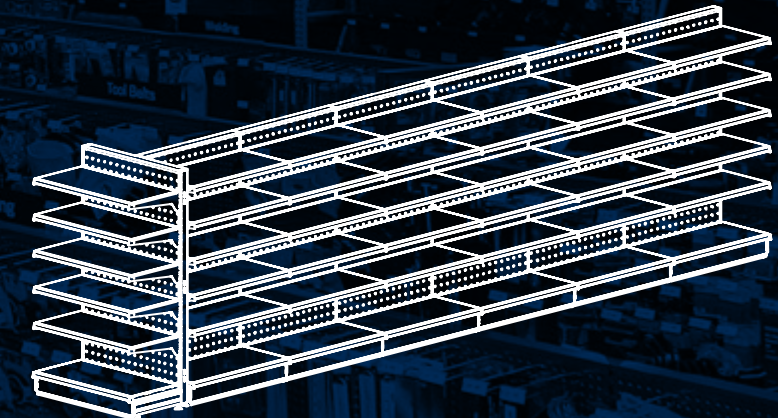

HEAVY-DUTY CAPACITY

Engineered to support large, heavy, and bulky items, ensuring safe and stable storage in retail environments.

WHY CHOOSE EMRACK BIG BOX RACKING SYSTEM?

GONDOLA SHELVING

EMRACK GONDOLA SHELVING SYSTEM

ENHANCE YOUR RETAIL SPACE WITH EMRACK GONDOLA SHELVING SYSTEMS – VERSATILE, DURABLE & PERFECT FOR MAXIMISING PRODUCT VISIBILITY.

Gondola shelving systems are a staple in retail environments, providing flexible and durable shelving for displaying a wide variety of products.

Featuring a freestanding design with double-sided shelves, gondola shelving maximises floor space and allows for efficient organisation of merchandise. Adjustable shelving levels and a sleek, modern appearance make it an ideal solution for enhancing product visibility and accessibility.

At Emrack, our gondola shelving systems are built from high-quality materials, ensuring durability even in high-traffic retail spaces.

From grocery stores to hardware shops and pharmacies, gondola shelving is customisable to fit the unique layout and inventory needs of your store.

ULTIMATE FLEXIBILITY

Easily adjustable shelving with thousands of optional accessories allow you to adapt to changing inventory and seasonal displays.

MAXIMUM PRODUCTIVITY

The freestanding, double-sided design optimises space utilisation, providing more display room within your store.

PRODUCT VISIBILITY

Open shelving ensures products are easy to view and access, improving organisation and customer experience.

HARD WEARING CONSTRUCTION

Built from sturdy, high-quality materials, gondola shelving withstands heavy use in busy retail environments.

WHY CHOOSE EMRACK GONDOLA SHELVING SYSTEM?

INDUSTRIAL STORAGE

STEEL & OEM SYSTEMS

EMRACK STEEL & OEM SYSTEMS

SECURE AND EFFICIENT STORAGE FOR HEAVY-DUTY APPLICATIONS WITH EMRACK'S STEEL STILLAGE & CUSTOM OEM RACKING SYSTEMS.

Steel stillages are heavy-duty storage solutions designed for handling and storing bulky or irregularly shaped items.

Built from durable steel, they provide safe and secure containment, making them ideal for industrial applications such as manufacturing, logistics, and warehousing.

Stillages are stackable, easy to transport and highly versatile, ensuring efficient use of space and improved workflow. Custom OEM racking systems are tailor-made solutions designed to meet the unique storage needs of your business.

Whether you're handling specialised inventory or require bespoke configurations, Emrack's custom racking systems are built to optimise your operations.

INVENTORY MANAGEMENT

Easy access to irregular shaped items to ensure faster picking and replenishment, improving workflow and reducing downtime.

ULTIMATE FLEXIBILITY

Fully customisable design that allows you to specify the height & position to fit your exact storage needs.

HEAVY LOAD CAPACITY

Perfect for storing heavy loads, with custom options to suit any requirements. Independently Certified & Engineered to meet all requirements.

HARDY TRADE TOUGH FINISH

Available in powder coated or hardy Hot-Dip Galvanized finish options with customisable colour schemes to match your company branding.

WHY CHOOSE EMRACK STEEL & OEM SYSTEMS ?
