PIGEON HOLE & MEZZANINE STORAGE SYSTEM

AUSTRALIAN
DESIGNED &
ENGINEERED

THE UNIQUE EMRACK PIGEON HOLE RACKING SYSTEM PROVIDES EASY, HIGH-DENSITY STORAGE AND PICKING OF GOODS—WHILE PROTECTING VALUABLE STOCK FROM DAMAGE

INDUSTRIAL STORAGE SYSTEMS

The Emrack Pigeon Hole System allows your customers & staff to view and select differing long-length products while providing your business with a space-saving mezzanine floor.

Each Mezzanine Pigeon Hole System is specifically designed to suit your operating model and includes detailed drafting & planning by our technical team to ensure your business benefits from the best possible configuration.

Our dedicated in-house engineers & draftsmen will work closely with you to ensure maximum use of your available space, while considering the specific requirements of your stock-holding levels and handling methods.

FEATURES

- Multi-level mezzanine option—fantastic way of storing your long-length items & gaining extra floor space
- Fully modular construction for unlimited configurations
- Hot-dip Galvanized or Powder Coated finishes for outdoor or indoor requirements
- Optional steel flooring system and Public Access & Non Public Access configurations
- Can be custom fitted to any specification required
- In-house Design, 3D Modelling & Layout Development Services

OUR PIGEON HOLE & MEZZANINE SYSTEM OFFERS INCREASED FLOOR-SPACE WHILE DELIVERING IDEAL LONG-LENGTH STORAGE IN AN EASY-TO-USE PICKING LAYOUT
